

WRITING ASSESSMENT  
Write your final composition here.

What do you like about school? What's fun about school is we have different kinds of sports. Also, the projects we have are fun too. Another reason is the activities we have. Those are some reasons why school is fun, there are some more but they can't be named right now.

First of all, having sports at school is very good to students. It helps to teach students they have more in them, besides gangs, drugs, and jail. Sports at school is a good way for kids to study more, if they want to stay on the team. There are lots of sports to play and you can do them all if you set your mind to it. That's why having sports at school is important.

Second of all, the projects we have at school are so much fun. Like drawing a map on a poster board, doing research, and exploring to find something new. Projects with your friends are cool, but projects with your enemies help you to get along with each other. Projects help you to learn something you didn't know about. If you think projects are cool wait until you read my fourth paragraph.

Last but not least, activities are the things I like about school the most. What about you? The activities I like about school are, the dances, the pep rallies, and the parties. We don't have to

to any classes during the parties or dance  
Its very fun to go to a school and learn and have  
fun at the same time.

In summary, Going to school is one  
thing and learning is too, but have fun is a whole  
different subject. Sports help kids get out of  
gangs, drugs, and jail. Projects help students to find  
something new, discover something and enjoy life. Also,  
Activities bring knowlege to kids, let the have  
some fun, and put spirit back into letting them do  
the work. That what I like about school and  
I'm writing this to get a good grade but  
to tell them how I feel.
